

## **ST. AUGUSTINE GRASS NAMED 'B12'**

### **Abstract**

'B12' is an attractive, green (RHS 137A) *Stenotaphrum secundatum* grass (St. Augustine grass), with a fast growth habit, brown with predominant yellow-green internode color, moderate internode length, and a long leaf blade that is highly infolded in mature turf, with a fine leaf appearance. 'B12' is also characterized by good disease and pest resistance and superior color retention under low fertilizer conditions.
